I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process under the European Parliament's and Council of the European Union Regulation on the Protection of Natural Persons as of 27 April 2016, with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (Data Protection Directive)

Oliwier Sellig

Aspiring front-end developer

MY BEST PROJECTS

CHARLIE'S

HTML, Sass, Javascript, React, Supabase

- Charlies is an e-commerce website for a fictional chocolate company of the same name.
- Its main function is to let customers buy chocolate packages that they can customize in the process.
- The page has also a working blog, all of which content was generated by AI.

Live site: <https://charlies-chocolate.netlify.app/>

GAMESPACE

HTML, Sass, Javascript, React

- GameSpace is an online video game library that allows users to search for games they are looking for.
- Users can add the game to their account library, wishlist the game, create a collection, and review the game.
- The page uses a free API called RAWG to import all the necessary information about the games.

Live site: <https://gamespacelib.netlify.app/>

PORTFOLIO

HTML, Javascript, React, Styled-components

- All round minimalistic front-end portfolio that's clear and extremely easy to navigate.
- The page includes all my best work, with a separate page for each project, my full tech-stack, and a wide range of ways to communicate with me.
- With the addition of styled-components the code is fully optimized, easy to read, and reusable.
