#### **Portfolio**

HTML / CSS / JavaScript / React / Styled-Components / Supabase / Figma

- My front-end portfolio exemplifies what a developer's portfolio should encompass. It includes sections about me, the technologies I work with, standout projects, and easy ways to get in touch.
- It's a clean, minimalist, and aesthetically pleasing website. The portfolio consists of a homepage and separate pages for each project.
- Each highlighted project features links to the live site and its repository, along with key details, a gallery, and an explanatory video.

#### **Charlies**

HTML / CSS / JavaScript / React / Sass / Supabase / Figma

- Charlie's is an online retail platform designed for the chocolate company bearing its name.
- The website allows users to customize their chocolate assortments and have them delivered to their doorsteps.
- Charlie's features user-friendly testimonials, an aesthetically pleasing 'about' section, a contact page with an interactive map, and a blog with AI-generated articles that can be filtered by title or category.

## **GameSpace**

HTML / CSS / JavaScript / React / Sass

- GameSpace is an online game collection that's all about helping users discover their favorite games and consolidating their gaming information in one convenient account.
- On the website, users can look for specific games using a custom search or handy filters. They can also include games in their personal libraries, wish lists, or collections and even share their thoughts through reviews.
- To stay updated with the latest game releases, the site taps into the RAWG Database API. It's your go-to place for all things gaming!

### **Deermood**

HTML / CSS / JavaScript

- Deermood is an internet-based retail platform created for the company bearing the same name, specializing in the sale of environmentally friendly and organic apparel.
- When users access the website, they can either make individual purchases or add multiple items to their cart for a single checkout.
- The site also features testimonials that users can interact with and a gallery showcasing customer photos. Furthermore, the products can be easily filtered, and users can search for a specific item by entering its name.
